

Required ERP API Endpoints

49 ENDPOINTS

Authentication and system

METHOD	ENDPOINT	PURPOSE
POST	/oauth2/token	Issue a short-lived machine access token.
GET	/api/v1/capabilities	Return API version, supported resources, scopes, events and limits.
GET	/api/v1/health	Return API availability status.
GET	/.well-known/openid-configuration	Return OpenID Connect discovery metadata.
GET	/oauth2/authorize	Initiate student or staff single sign-on.
GET	/oauth2/userinfo	Return authenticated ERP identity claims.
POST	/oauth2/logout	End an ERP-backed single sign-on session.

Organization and academic structure

METHOD	ENDPOINT	PURPOSE
GET	/api/v1/organizations	List campuses, schools, faculties and departments.
GET	/api/v1/academic-periods	List academic years, semesters, terms and intakes.
GET	/api/v1/programs	List official programmes and qualifications.
GET	/api/v1/courses	List official courses, subjects or units.
GET	/api/v1/program-curricula	List programme-to-unit curriculum mappings.
GET	/api/v1/offerings	List units delivered for a period, class, campus and study mode.
GET	/api/v1/cohorts	List official cohorts or classes.

Students, staff and admissions

METHOD	ENDPOINT	PURPOSE
GET	/api/v1/students	List and incrementally synchronize students.
GET	/api/v1/students/{student_id}	Retrieve one student by immutable ERP ID.
GET	/api/v1/students/by-admission-number/{admission_number}	Retrieve a student by admission number.
GET	/api/v1/staff	List and incrementally synchronize staff.
GET	/api/v1/staff/{staff_id}	Retrieve one staff member.
POST	/api/v1/applicants	Create an applicant using an idempotency key.
GET	/api/v1/applicants/{applicant_id}	Retrieve applicant and admission-processing status.
GET	/api/v1/applicants/by-external-reference/{reference}	Retrieve an applicant using the originating external reference.

Registration, enrolment and teaching

METHOD	ENDPOINT	PURPOSE
GET	/api/v1/program-registrations	List official student programme registrations.
GET	/api/v1/enrollments	List official student unit or offering enrolments.
GET	/api/v1/teaching-assignments	List instructor-to-offering assignments and roles.

Finance and clearance

METHOD	ENDPOINT	PURPOSE
GET	/api/v1/fee-structures	List official fee structures and fee codes.
GET	/api/v1/invoices	List official student invoices and outstanding items.
GET	/api/v1/students/{student_id}/account-summary	Return invoiced, paid, balance, sponsorship and waiver totals.
GET	/api/v1/receipts	List official ERP receipts.
GET	/api/v1/clearances	List and incrementally synchronize clearance decisions.
GET	/api/v1/students/{student_id}/clearance	Return the current clearance decision for one student.

Payments and reversals

METHOD	ENDPOINT	PURPOSE
POST	/api/v1/payments	Post a verified payment using an idempotency key.
GET	/api/v1/payments/{erp_payment_id}	Retrieve ERP payment status and receipt details.
GET	/api/v1/payments/by-external-reference/{source_payment_id}	Retrieve a payment using its originating payment reference.
POST	/api/v1/payment-reversals	Submit an approved payment reversal or refund.
GET	/api/v1/payment-reversals/{reversal_id}	Retrieve payment reversal status.
GET	/api/v1/payment-reversals/by-external-reference/{reference}	Retrieve a reversal using its originating reference.

Official results, attendance and completion

METHOD	ENDPOINT	PURPOSE
GET	/api/v1/result-definitions	List accepted result structures and grading definitions.
POST	/api/v1/results:bulk	Submit approved final results in bulk.
GET	/api/v1/results	List submitted and official results.
GET	/api/v1/results/{result_id}	Retrieve result acceptance, rejection or final status.
POST	/api/v1/attendance-summaries	Submit approved attendance summaries.
GET	/api/v1/attendance-summaries/{attendance_id}	Retrieve attendance-summary processing status.
POST	/api/v1/completions	Submit verified programme, course or unit completion.
GET	/api/v1/completions/{completion_id}	Retrieve completion processing status.

Webhook endpoints

METHOD	ENDPOINT	PURPOSE
POST	/api/v1/webhook-subscriptions	Register a webhook callback and subscribed event types.
GET	/api/v1/webhook-subscriptions	List configured webhook subscriptions.
DELETE	/api/v1/webhook-subscriptions/{subscription_id}	Remove a webhook subscription.
POST	https://<lms-domain>/api/v1/integrations/ultimate-erp/webhooks	LMS receiver for signed ERP change events.
